

## Enrolment Information for Child Care Centres

Licensed child care centres in Ontario are required by law (Child Care and Early Years Act, 2014), to ensure that children who attend child care centres are immunized according to the Medical Officer of Health.

Recommendations for immunizations are according to the current provincial publicly funded immunization schedule. The health unit reviews immunization records of all children attending licensed child care centres.

Please attach a photocopy of your child's immunization card/record and return to the child care centre.

Parents should submit their child's immunization information 24/7 online using the secure, online immunization portal ICON (Immunization Connect) at [www.huronhealthunit.ca/ICON](http://www.huronhealthunit.ca/ICON). If your child is not up to date with immunizations according to HU records, the missing immunizations will be listed at the bottom of the record. Parents will be required to submit a copy of the immunization record through ICON.
